

Digitize

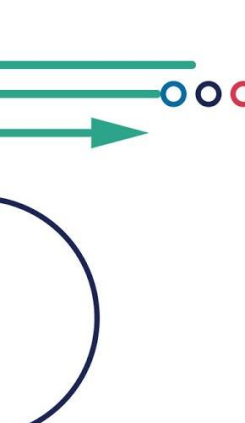

hack the world

Food Sponsorship Prospectus

WHAT IS DIGITIZE?

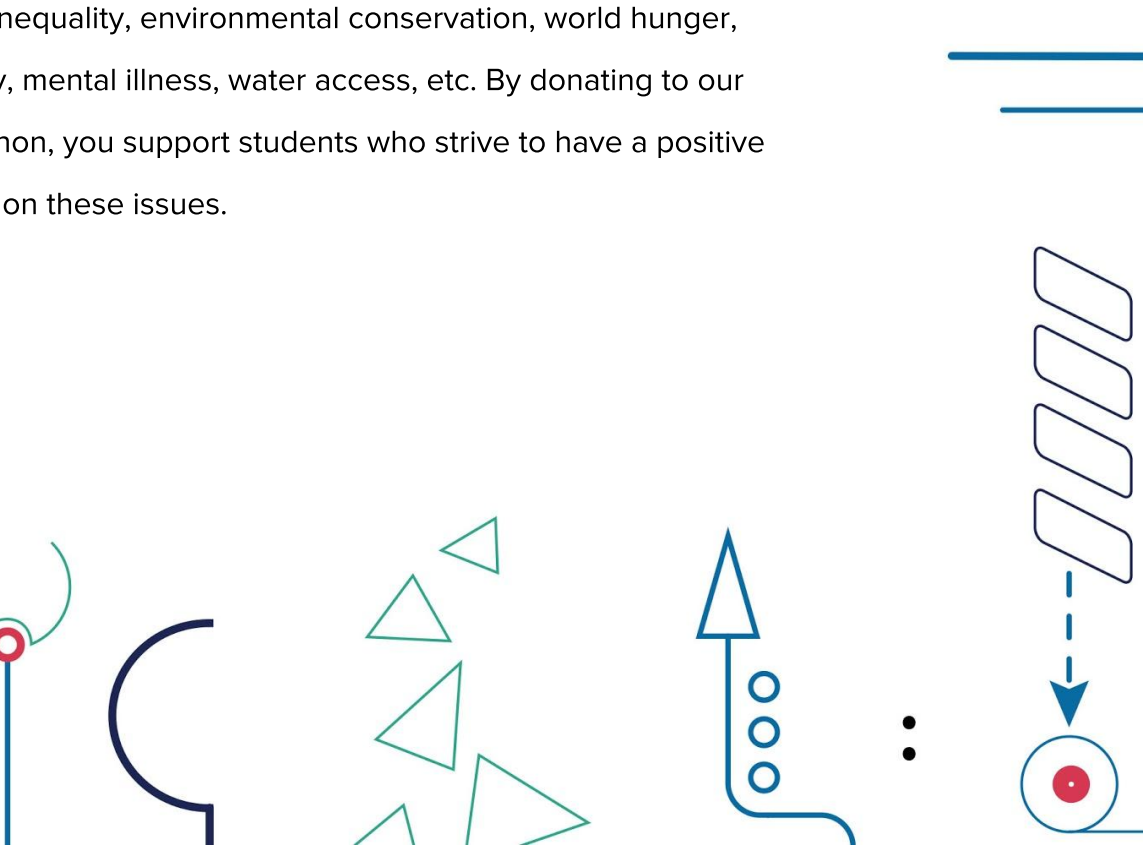

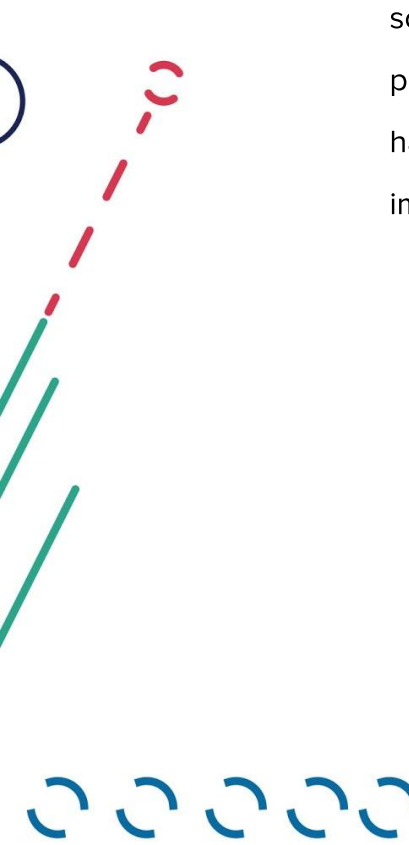

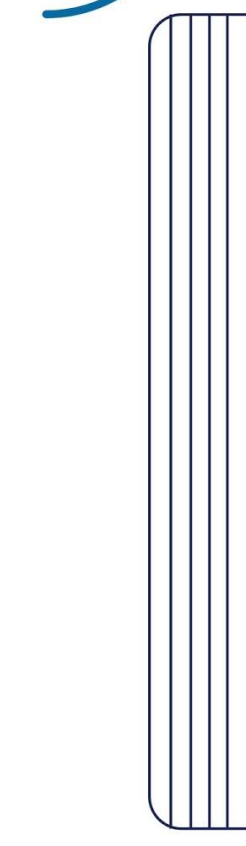

Digitize is a hackathon for high school students in the Bay Area, taking place overnight from **September 22-23 from Saturday at 11am to Sunday at 12pm**. Our goal is to educate students about computer science and programming by providing them with workshops and mentors, so by the end of the hackathon, each team will have a project to present in front of our judging panel.

WHY DIGITIZE?

Unlike other hackathons, Digitize is determined to promote social good through technology and computer science. We intend to accomplish this goal by encouraging our attendees to create projects that address social injustices or global issues. For instance, at Digitize we have specific categories of awards ranging from social inequality, environmental conservation, world hunger, poverty, mental illness, water access, etc. By donating to our hackathon, you support students who strive to have a positive impact on these issues.

WHAT ARE WE ASKING FOR?

Digitize is in need of food, drinks, and snacks to fuel the hungry hackers that will be coding at our event. We would greatly appreciate your help by providing food for the participants at Digitize in order to ensure that our hackers are satisfied and able to work unhindered. Our sponsors are supportive and inspiring for young engineers and the future pioneers of tech fields. **As our partner we ask that your restaurant/business choose one (or more!) of the following meals to provide for our event.**

Breakfast

Lunch

Dinner

Midnight Snack

Drinks

Snacks

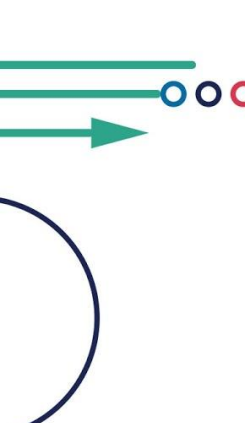

If you are interested in providing specialized meals such as vegan, gluten-free, vegetarian, please feel free to let us know.

BENEFITS OF HOSTING DIGITIZE

This is a great opportunity to introduce your restaurant's product and food to potential customers and publicize the brand with a diverse group of coders. With the assistance of your business, we believe that Digitize will be a huge success and help engage many students with the wide variety of opportunities that come with learning to code.

OTHER WAYS TO HELP

We would readily welcome any additional contributions for Digitize Hackathon. If you would like to sponsor us by contributing money, please ask for our [sponsorship packet](#). In the unfortunate event that your company is unable to partner with us, we would still greatly appreciate any of the following contributions:

- Inviting speakers to present at tech workshops
- Asking employees to be mentors at Digitize
- Spread the word of our event to your customers
